

# Flow Tube Exercising Tool (FTET)

**Impact Selector’s Flow Tube Exercising Tool (FTET)** is a wireline deployed tool for the purpose of shifting or exercising the internal Sub Surface Safety Valve (SSSV) Flow Tube in the upward direction, when normal hydraulic actuation has failed.

In the event of debris or scale inhibiting Flow Tube movement, the FTET uses the existing nipple profile No-Go within the Tubing Retrievable Sub Surface Safety Valve (TRSSSV) to accurately position the slips at the preferred location within the Flow Tube. The tool is then initiated by gently jarring down, enabling the flow tube to be exercised in the desired direction.

To release from the Flow Tube, jarring in the appropriate direction locks the tool out so that it no longer grips the inside of the flow tube, enabling retrieval to surface.

## Features:

- Long slips for controlled load distribution
- Full Radial Coverage (FRC) slip design
- Available to suit any Safety Valve

## Benefits:

- Brings stuck Safety Valves back to working order
- Can save replacing Safety Valve
- No need for specialist personnel

FTET Configurations			
Direction	Safety Valve Seal Bore Size (inches)	*No-Go Size (inches)	*No-Go To Slip Length (inches)
Upward	1.875	1.91	35
Upward	2.312	2.34	29
Downward	2.812	2.86	23
Upward	2.812	2.86	28
Upward	2.812	2.86	23

## Where Advanced Technology and Responsive Service Come Together to Reduce the Risk

For over 2 decades, Impact Selector has served the upstream oil and gas markets with innovative products and services that enhance formation evaluation and well intervention activities. Impact Selector is committed to the success of our customers by combining operational experience, creative design, state-of-the-art manufacturing, and product testing facilities to provide *Intelligent Conveyance®* products and services worldwide to reduce costs and minimize risk.

### Products

#### Open Hole Wireline

- MFT/MFT HPHT Multiconductor Jar
- MCX/MCX HPHT Multiconductor Jar
- SMART Jar™
- Wireline Stand Off
- Wireline Tool Stand Off
- Roller Bogie Hole Finder
- Bull Nose Roller Hole Finder
- Roller Bogie® Systems
- ImpactPro Prediction Analysis Software

#### Cased Hole E-Line

- XCS / XCS HPHT Jar
- Xcalibur Jar
- SMART Sens™ Tension Sub
- Low Friction Tubular Jar
- Roller Bogie® Systems
- Perforating Roller Bogie®
- Guide Roller Bogie®
- Orienting Perforating Tool

#### Cased Hole Slickline

- Blockbuster Jar
- Intensifier Jar
- Impact SL Jar
- Low Friction Tubular Jar
- Xcalibur Jar
- Roller Bogie® Systems
- Guide Roller Bogie®
- High Deviation Roller Bogie® Jar
- Low Loader Roller Bogie® Jar
- Advanced Kickover Tool
- Chemical Jetting Soak Tool
- Double Knuckle Joint
- Flapper Investigation Tool
- Flow Tube Exercising Tool
- Safety Valve Protection Sleeve

### Services

#### Leasing and Rental of Wireline Tools

##### Consultation Services

- Operation, Customization, Maintenance and Repair

##### Research and Development

- Fast Track New Tool Development
- Turn-Key Engineering Design, Prototype Testing and Manufacturing
- Mechanical and Electrical Engineering
- Modeling Software

##### Support

##### 24 hours a day/7 days a week

- Wellsite Operations
- Training
- Maintenance
- Technical
