

Oriented Perforating Tool (OPT)

Take Aim. FIRE!
**Preselect the direction in which
perforating guns fire**

**Impact Selector's
Oriented Perforating
Tool (OPT) is a**

wireline deployed, passive, roller platform which is used in combination with Impact Selector's Roller Bogie® conveyance system.

The OPT is connected to the bottom of the gun string, ensuring that the gun rotates and the perforating charges are positioned at the preferred orientation, in relation to low side datum. This method ensures that production opportunity is optimized by perforating in the desired fracture plane.

The OPT is made up of modular weight-biased sections that combine to deliver torque to the gun assembly, rotating the guns to the desired direction of fire. Gun alignment is adjusted manually on surface using an indexing system to select the required orientation prior to running in hole.

The dial up indexing feature of the OPT ensures fast orientation set up. Unlike certain other systems, the OPT places no restriction on the size or type of shape charge that can be used.

The OPT has been used globally with a proven track record of success, reducing both cost and risk in perforating operations.

Features:

- Simple mechanical design
- Low maintenance requirements
- Low friction roller platform
- Modular system
- Fast set-up on surface

Benefits:

- Reduces cost, reaches extended depths and higher deviation without the need for more costly interventions services
- Reduces risk, no power required from surface to operate OPT

Specifications					
OPT Size Max (inches)	*Weight (lbs)	*Length (inches)	Max Gun Size OD (inches)	Service Type	Connection Type
3.350	174	124	2.875	Sour or Severe Sour Service available	Connections available to suit customer specifications
3.600	189	124	2.875		

**Tool weights and lengths are average values per tool size. Other sizes available upon request.*

Where Advanced Technology and Responsive Service Come Together to Reduce the Risk

For over 2 decades, Impact Selector has served the upstream oil and gas markets with innovative products and services that enhance formation evaluation and well intervention activities. Impact Selector is committed to the success of our customers by combining operational experience, creative design, state-of-the-art manufacturing, and product testing facilities to provide *Intelligent Conveyance®* products and services worldwide to reduce costs and minimize risk.

Products

Open Hole Wireline

- MFT/MFT HPHT Multiconductor Jar
- MCX/MCX HPHT Multiconductor Jar
- SMART Jar™
- Wireline Stand Off
- Wireline Tool Stand Off
- Roller Bogie Hole Finder
- Bull Nose Roller Hole Finder
- Roller Bogie® Systems
- ImpactPro Prediction Analysis Software

Cased Hole E-Line

- XCS / XCS HPHT Jar
- Xcalibur Jar
- SMART Sens™ Tension Sub
- Low Friction Tubular Jar
- Roller Bogie® Systems
- Perforating Roller Bogie®
- Guide Roller Bogie®
- Orienting Perforating Tool

Cased Hole Slickline

- Blockbuster Jar
- Intensifier Jar
- Impact SL Jar
- Low Friction Tubular Jar
- Xcalibur Jar
- Roller Bogie® Systems
- Guide Roller Bogie®
- High Deviation Roller Bogie® Jar
- Low Loader Roller Bogie® Jar
- Advanced Kickover Tool
- Chemical Jetting Soak Tool
- Double Knuckle Joint
- Flapper Investigation Tool
- Flow Tube Exercising Tool
- Safety Valve Protection Sleeve

Services

Leasing and Rental of Wireline Tools

Consultation Services

- Operation, Customization, Maintenance and Repair

Research and Development

- Fast Track New Tool Development
- Turn-Key Engineering Design, Prototype Testing and Manufacturing
- Mechanical and Electrical Engineering
- Modeling Software

Support

24 hours a day/7 days a week

- Wellsite Operations
- Training
- Maintenance
- Technical
